

Photonic Online Meetings: Registrations are open!

Following the success of our first three events in 2020 and 2021, the fourth edition will be held on 23 November with the stated objective of targeting Europe and the international market.

Targeting this time mainly major industrial contractors, this edition has a clearly defined theme: MANUFACTURING.

The ambition is to offer our participants the opportunity to meet new companies, and to create or strengthen their business with European partners.

In a single day, key accounts, technology and service providers, investors, institutions, public and private partners will meet through the organisation of qualified BtoB meetings completed by conferences and product & service webinars.

More than 350 entities are expected !

MORE INFORMATIONS AND REGISTRATION AT:

www.onlinemeetings.photonics-france.org

Website "Orientation Photonics"

We will soon launch our website to promote photonics to young French people.

Presentation of photonics, web series on the use of photonics in pop culture, educational resources and interviews on jobs.

If you have educational resources, conferences, videos, testimonies, teaching tools, please contact us! contact@photonics-france.org

Project supported by the Ministry of Employment
