

## Space Project Manager (M/F)

### Responsibilities

Under the authority of the General Manager, you work on optical instrumentation projects for the Aeronautics and Space fields where you coordinate all contractual tasks in direct interface with customers, as international space agencies.

Your main responsibilities are:

- Coordinate multifunctional teams (Design, Industrial Means, Integration and Test and Product Assurance) and communicate effectively with customers, suppliers and subcontractors
- Deliver project master scheduling
- Support the risk management activities
- Support the organization of progress meetings and project reviews
- Maintain the Action Item List, the KPI trackers and the reporting means

### Skills

Graduate of a **MSc Degree in Engineering (Optical, Mechanical, Electrical, Aerospace...)**, you have 5 years of experience in a similar role, 2 of them in the space sector in complex programme or project delivery environment with multiple delivery partners and stakeholders.

Then you have the following skills:

- Experience in space complex projects
- Good planning knowledge
- Experience with financial and budget management
- Highly motivated self-starter, autonomous, proactive and dynamic
- Excellent written/verbal communication skills and presentation skills
- Fluent english

This position is available as soon as possible in **a permanent contract (CDI)** and is located in **the East of France or home-office based**.

Please send us your resume under the reference **n°4387** .
